for Registrar General, India

# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office last certificates held).

Full particulars obtainable from all post offices, District Organisers of the National Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 16th December, 1950—contd.

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 16th December, 1950 relate to 120 towns with an estimated population of 15,017 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 52% of the total number of towns representing 53% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 11,124 and 4,846 representing birth and death rates of 38.5 and 16.8 per thousand of population respectively.

(A) States (Parts A and O).—The data here relate to 101 towns with an estimated population of 12,526 thousands. Information about Assam, Bihar, Madhya Pradesh, Madras and West Bengal could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 50% of the total number of towns representing 51% of the total population is covered. The numbers of births and deaths recorded in these towns were 9,876 and 4,125

representing birth and death rates of 40.2 and 17.1 per thousand of population respectively. The table at the end gives the position by States.

Puri in Orissa was the only town which had a high death rate of 60.4 per thousand of population and this high death rate was mainly due to deaths from fevers.

(B) States (Part B).—The data here relate to 19 towns with an estimated population of 2,491 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 59% of the total number of towns representing 66% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,448 and 721 representing birth and death rates of 30.2 and 15.1 per thousand of population respectively.

No towns recorded a high death rate of 50 or over per thousand of population.
